Jasman Singh

Sterling Heights, MI | US Citizen | (586) 718-7060 | jasmansidhu974@gmail.com | linkedin.com/in/jasmanss | github.com/jasmanss

Education

Oakland University — Rochester Hills, MI

Bachelor of Science in Computer Science, Concentration in Artificial Intelligence — *Expected May 2027*

- **Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Database Design & Implementation, Operating Systems, Computer Networks

Experience

Software Engineering Intern — May 2026 – Present

Motherson Group — *Sterling Heights, MI*

- Built a preventive-maintenance web app using **Python, Flask, SQL, and JavaScript** to replace paper checklists across **147 machines**, letting technicians complete maintenance from their phones via QR codes.
- Built maintenance dashboards tracking **MTTR, MTBF, and compliance metrics** from production records, giving supervisors visibility into equipment performance and audit readiness.
- Automated maintenance alerts using **Python and Microsoft Power Automate**, replacing manual follow-ups with Microsoft Teams notifications.
- Deployed the app to an on-premise **Linux (Ubuntu)** server using **Gunicorn, systemd, HTTPS, and automated backups**, with **400+ pytest tests** covering production workflows.

Frontend Developer (Part-time) — June 2026 – Present

Aurelius Holdings LLC — *Remote*

- Built the customer-facing frontend of a live ecommerce site using **React, TypeScript, Vite, and CSS**, creating reusable components and routed pages for new product features.
- Implemented cart state, pricing rules, and form validation with React hooks, and connected the interface to **Supabase** for products, orders, and customer authentication.
- Shipped weekly updates through **Vercel** and resolved customer-reported bugs across the production site.

Projects

Portlkit, White-Label Client Portals for Freelancers | *Next.js, TypeScript, Supabase, PostgreSQL, Vercel* — portlkit.com

- Built a full-stack SaaS using **Next.js, TypeScript, and Supabase** that combines invoices, milestones, files, and messages into one shareable client portal without requiring client accounts.
- Secured client data with **PostgreSQL row-level security, unguessable share tokens, and Server Actions**, and automated overdue-invoice reminders with **Vercel Cron and Resend**.

Imperium, Natural-Language Mac Agent | *Python, FastAPI, Claude API, Next.js, TypeScript, GitHub Actions*

- Built a natural-language Mac automation agent using **Python, FastAPI, Claude API, and Next.js** that lets users open apps, send email, and run Git commands from their phone.
- Added **pairing-token authentication, permission controls, and confirmation gates** to block destructive actions, with safety evals in **GitHub Actions** that fail builds when protections are weakened.

HairStyl, AI Hair and Grooming Assistant for iOS | *Swift, SwiftUI, OpenAI API, Git, TestFlight*

- Built an **iOS grooming assistant** using **Swift, SwiftUI, and the OpenAI API** that analyzes user photos and generates personalized recommendations, reaching **150+ active users** through TestFlight.
- Built the **AVFoundation camera flow** and an async OpenAI client with retry handling, and integrated **Supabase authentication and RevenueCat subscriptions**.

Callback, Job Application Tracker | *React, TypeScript, Vite, Gmail API, Claude API* — jasmanss.github.io/callback

- Built a browser-based job application tracker using **React, TypeScript, and Vite** with board and table views, follow-up reminders, and CSV/JSON import and export without requiring an account or server.
- Built a **Gmail parser** that updates application statuses from LinkedIn, Indeed, Greenhouse, Lever, and Workday emails, with an optional **Claude** fallback and **20+ Vitest tests**.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, Swift, HTML/CSS
Frameworks & Libraries: React, Next.js, Node.js, Flask, FastAPI, SQLAlchemy, Vite, SwiftUI, Tailwind CSS
Databases & Infrastructure: PostgreSQL, SQLite, Supabase, REST APIs, Linux (Ubuntu), Gunicorn, systemd, Vercel
Testing & CI/CD: pytest, Vitest, XCTest, GitHub Actions
AI & APIs: OpenAI API, Claude API, Ollama
Tools: Git/GitHub, Microsoft Power Automate, Figma
